

# Navigation

**Situation:**

Everyday life on PZ9 Floor

**Target Group:**

Students, visitors, employees who pass by the hall

**Setting:**

Hallway, movement of people, offices

**Themes:**

- Offices navigation
- Availability of the employees (Professor, PhD students, etc... )
- Employees' profiles

# Navigation

*The Hallway of PZ9 is quite empty and boring to navigate, especially considering its' length. Finding the employees and their offices is quite a task to many people who visit the building. In most cases, it requires one to shift his/her head left to right as he/she navigates through the hallway. This can lead to undesirable situations for instance: collision with other people from the opposite direction, not to mention neck pain or injury...*

Notes:
