Ambient Lighting

Situation:
Use colorful light to create a certain ambience.

Target Group:
People in the room with the lights.

Setting:
Indoors, dining room, living room, …

Themes:
- Lights for dinners, festivals, parties.
- Reaction on music.

Ambient Lighting

"You are planning a dinner for your friends. To give the room a better ambience you add some warm colored lights. Later the day the lights can also react on the music, to complement the genre and theme of the ambience. Other possible targets could be commercial domains like restaurants or pubs, which can improve the ambience of their rooms and therefore get more people visiting them."

Notes:
