

Lighting in the Context of Security

Jurec / pixelio.de

Situation:

Something unexpected or even dangerous happens and the user attention is called by a warning light. Or the lighting protects the user by discouraging other people from doing a crime.

Target Group:

Nearly everyone.

Setting:

Dark rooms/places or dangerous places which are only sparsely lighted.

Themes:

- Warning lights
- Lights with motion detector
- Time controlled lights
- Traffic lights
- Streetlights

Lighting in the Context of Security

Lighting in the context of security is used at nearly every place and is crucial for our daily life. Traffic lights prevent accidents, lights with motion detector or time controlled lights discourage burglars, the street lights give us a feeling of security on the way home and illuminated signs or displays help us to find one's way.

Notes:
