## Kinect Projector Dance

### Description:

*Combination of dance method and interactive media technology creates great communication. This idea was implemented by kinect camera which is responsible for capturing the dancers movements, a notebook to evaluate the captures information and a projector to display the interactive graphics.*

*This system can be used in any place and multiple dancer can dance at time. Here, searching for new shapes, transaction, identities and meanings that means different possibilities where melt organic hiphop dance with projected light. Dancers follow their own flow that makes beautiful natural flow with interactive media technology.*
