Tweet-a-Pot: Twitter Enabled Coffee Pot

Keywords:

Twitter pot

Input:

Phone signal message

Output:

Start,Stop pot

Technology:

Arduino Board, Mobile, Coffee machine, Laptop

Tweet-a-Pot: Twitter Enabled Coffee Pot

Description:

Tweet-a-pot is fancy twitter enable device.Idea of making coffee from anywhere using cell phone reception, twitter and arduino board.

The tweet-a-pot is the easy implementation for remote device control! with a bit of code and some hardware, you can have your very own twitter enabled coffee pot.

To make your very own tweet-a-pot you will need the following:

1 Power Switch Tail, this is basically a relay that is used to interface with the AC voltage
1 Arduino Board
1 Computer running the arduino IDE and Python
1 Drip Coffee Pot.
